

Electro-Flor Coating FAST FACTS

ELECTRO-FLOR COATING FAQs

What makes Electro-Flor Coating the better way to protect against electrostatic damage?

There are at least eight reasons why Electro-Flor Coating from Dex-O-Tex should be specified for interior building environments that require must-not-fail conductive and static-dissipating flooring systems:

1. Extremely consistent, uniform, and predictable conductive (ECD) or static-dissipating (ESD) performance
2. High tolerance to shearing/abrasion with monolithic, seamless coverage
3. Easy, contractor-friendly application
4. Water-based epoxy formulation with virtually no odor or VOC off-gassing
5. Fast-drying characteristics for up to three coatings per day (quick return to service)
6. Easily built-out for various film thickness up to 12 mils per coat
7. More durable than tile/sheet goods in forklift traffic
8. Available in an attractive range of colors

Where can you download product safety data sheets, product description sheets, brochures, chemical resistance chart, and other Electro-Flor Coating information?

Visit dex-o-tex.com/products/epoxy-coating/electro-flor/ for a wide assortment of technical and maintenance materials.

Is Electro-Flor Coating available now for immediate ordering?

Electro-Flor Coating is available now nationwide for immediate ordering. Visit dex-o-tex.com/sales-rep-territories/ for the name and contact information of your local rep.

WHAT OTHER FLOORING PROFESSIONALS SAY ABOUT ELECTRO-FLOR COATING

"The most important thing is support and delivering the product when I need it. I found out on a Wednesday we're installing next week. Dex-O-Tex not only shipped Electro-Flor Coating on time, they also flew out their chemist to make sure we were within spec after installation. Nobody else would do that."

William Young, Founder and President

PROVEN ECD AND ESD PERFORMANCE IS ONLY HALF THE STORY

The coating application you specify for sensitive ECD or ESD environments should be guided by two considerations—proven coating performance from a respected company and industry-leading installation support.

For over 80 years Dex-O-Tex has been the go-to flooring and surfacing solution for architects, plant/facility engineers, and flooring contractors nationwide. Today that tradition of product quality, consistency, and innovation offers specifiers unmatched ordering confidence across a wide range of challenging flooring requirements.

What's more, only Electro-Flor Coating offers the peace of mind of Dex-O-Tex support. All installations are completed by factory trained flooring professionals and closely supported by a factory technical team. Your installation will meet or exceed all expectations and requirements.
